 **GOAT**

Engineering Manager: Apr 2019

Building e-comm applications at the global scale needed by GOAT Group has been an honor. I helped goat.com become our fastest growing client platform YoY for the last 3 years. Now, in the seller experience, I oversee 3rd party integrations, powerseller capabilities, and our desktop experiences.

 **AMP Agency**

Front-End Director: Aug 2018 - Apr 2019

At Amp, a high paced digital agency, I improved the company's front-end practice. I doubled our full time engineers, managed a global group of contractors, and introduced new efficient technology pipelines. Our teams built innovative apps for high fashion clients that launched on time and increased our client's revenue.

 **Intel**

Engineering Team Lead: Jun 2016 - Aug 2018

At Intel's Agency Inside group I crafted complex global campaigns for the 2018 Winter Olympics, SuperBowl LI, and many major business groups (10B+) on our way to AdAge's In-House Agency of the Year and multiple Cannes Lions. I pitched new ways to utilize technology and led teams in executing sites, apps, installations, and other campaign deliverables.

 **PresenceLearning**

Software Architect: Dec 2014 - Jun 2016

As the fourth employee on the product team I helped students with speech disabilities across the country receive online therapy. I led the rewrite of their telehealth platform to a responsive and touch optimized experience with video conferencing via WebRTC, realtime whiteboarding / therapeutic activities, and a user experience focused on advancing student outcomes.

 **Razorfish**

Presentation Layer Architect: Jul 2011 - Dec 2014

Razorfish is stocked to the gills with smart people that I had the pleasure of working with. In my time at this agency I led international teams in creating, developing, deploying and maintaining projects for Delta, AT&T, T-Mobile and Intel. These projects ranged in scope and implementation from e-commerce web applications to iOS and facebook apps.
